July 24, 2020 Version 2.2.3 Error Fixes and General Improvements I Love This Game! If any of you are interested, this game is very safe! I like to play this game because you can visit others and maybe buy some stuff there, customize your avatar, and get more coins and items as you play! What I suggest is that you add some buttons that will say: Change the name or reboot progress, because ever I want to start all over again I have to remove and get the game again. I'd also enjoy the game even better if we could see all the furniture in our stores rather than buying slots and waiting for furniture and other restocking accessories, because it would be much easier if the stores we like it. But, in general, the game deserves a five-star rating! So I love this game, but ... I want it to be more funny as our pet character, so I want them to be pets, but somehow I really like how when it's night in real life it's night in the game. Also, on Mother's Day, why does he tell Muak I don't know what that means, does it mean a kiss or @ something? Proposition 1, if we want to change the color of our avatar, can't we have as a thing where we can choose all colors? As basically a rainbow thing and then you can drag your finger and what your favorite color you can choose is. Proposition 2 So pls fix make-up errors, because ever I want to have a makeover ... it gets me away from the game @ @ so pls fix it, but this is me review bye! Pls take my suggestions and have a good day... or night this game is addictive, but in a good way. It's not with me on it all the time, but if I'm bored it really entertains me. I just want you to be able to have a better conversation NPCs BC I am always bored with them and do not feel any real emotions towards them. I know I only said one thing, but I'm sure a lot of people want it. Being able to possibly do more activities like getting to and sell your paintings and the higher your level the more money you get from them or get to hold their own festivals or parties with other residents or get it... The opportunity to open your own store @ @ this game is great - developer, Happy Labs Pte Ltd, has not provided details of its privacy and data processing practices to Apple.
